

**Position: Engineering Services Supervisor**

**Posting Close Date:** Review of applications will continue until the position is filled.

**Pay Range:** \$93,052 - \$132,931 annually

**Please note:** Actual starting pay will be determined at the time of offer based on the experience, education and training of the successful candidate.

**Engineering Services Supervisor Description**

Austin Utilities is seeking a talented and self-driven individual to join our Engineering team. Under the general direction of the Utility Operations Director, performs complex and professional engineering work relating to the installation of water, natural gas, electric and other public works projects and programs ensuring technical competence and compliance with all current regulations, codes and policies. Provides leadership by embracing and promoting a culture of caring, curious and committed.

**Key responsibilities include but are not limited to:**

- Prepares engineering project plans, including drawings, specifications, required permit procurement and material ordering for the gas and water distribution system.
- Develops short-term and long-term planning by completing analysis with modeling tools for the gas and water systems considering system loads, reliability and future needs.
- Originates engineering specifications required for contract bids (e.g. survey mapping projects, horizontal directional drilling, excavation work, water supply and distribution system, etc.)

**Why should you apply?**

Austin Utilities has been recognized as one of the “Best Places to Work” in Southeast Minnesota. We put your safety first, and have been the recipient of several safety awards. As an integral member of our Engineering team, this position provides an opportunity for personal and career development to advance your professional career as you demonstrate your expertise within our organization. You will have the opportunity to work with a very dedicated team of professionals who are passionate in their service to our community. And, we offer a work environment where work-life balance is realized.

**What will it take to be successful?**

- Bachelor’s degree in mechanical or civil engineering, or a related field.
- Five (5) years of increasing responsibility in natural gas and/or water distribution systems, engineering and operations.
- Valid Minnesota Driver’s license.
- An equivalent combination of education and experience is acceptable as a minimum qualification.

**What a career at Austin Utilities can offer you...**

As a community-owned enterprise for over 100 years, we offer the stability of providing a required service and commodity for our community. We are a diverse team of professionals who take pride in delivering exceptional service to our community through new and innovative technologies. We understand employees have competing priorities. That is why we have created an environment that embraces teamwork and flexibility. Join a diverse team of high performers who take pride in delivering exceptional service to our community and tap into the power of your potential!
