GIS Analyst Description

Austin Utilities is seeking a talented and self-driven GIS Analyst to join our Engineering Services team. The successful candidate will be responsible for developing, operating, and maintaining the GIS system for the water, natural gas, electric, and fiber-optic utilities. Responsible for GIS program planning, coordination, GIS mapping, database management, and application development. Performs planning, development, and administration of GIS data sets; to include development of databases and applications for record, database management, manipulation and data entry. Creates maps using ESRI ArcGISPro and AutoCAD software for internal and external customers using geo-spatial data. Manages installation, configuration, upgrades, and support of GIS system including databases, software and user applications. Develop GIS solutions and provides support after the products is delivered, incorporate software solutions within the GIS architecture in order to meet the future needs of the organization.

Key responsibilities include but are not limited to:

- Develop, operate, and maintain a GIS system for the water, natural gas, electric, and fiber-optic utilities.
- Responsible for GIS program planning, coordination, GIS mapping, database management, and application development.

Why should you apply?

Austin Utilities has been recognized as one of the “Best Places to Work” in Southeast Minnesota. We put your safety first, and have been the recipient of several safety awards over the past six years. As an integral member of our engineering team, this position provides an opportunity for personal and career development to advance your professional career as you demonstrate your expertise within our organization. Austin Utilities has an Enterprise License with ESRI, providing all the tools needed for developing a successful GIS System. You will have the opportunity to work with a very dedicated team of professionals who are passionate in their service to our community. And, we offer a work environment where work-life balance is realized.

What will it take to be successful?

- The ideal candidate will have graduated from an accredited technical or community college in Geographic Information Systems (GIS) or related field such as Geography, Engineering Technology, Civil Engineering, Computer Science with an emphasis in GIS coursework and training, and a minimum of two years full-time experience with GIS mapping and database management using ESRI ArcGIS software or an equivalent combination of experience and education.
- Possess a current and valid driver’s license.

What a career at Austin Utilities can offer you...
