Attention Martin Enthusiasts!

If you’re a bird watcher, our Purple Martins are back and you can see them by checking out our Live Bird Camera online at www.austinutilities.com or by visiting the southwest corner of our property. Did you know Purple Martins are the second most studied martins in the world? That is because they exclusively live in bird houses and do not build nests. Each year we track the number of eggs that are hatched and fledged.

Purchasing a new home is a busy and exciting time. Austin Utilities has made transferring utility services easier by giving different options to apply for your new service – when it is convenient for you! It is as easy as 1 – 2 – 3!

1. Applying for service online using SmarThru - not only is it easy to apply, but you will have all the benefits of managing your account electronically.*

2. Email us for an application at customerservice@austinutilities.com*

3. Stop in to see us and apply in person at 1908 14th St NE. Our customer service staff is ready to help answer all of your questions and get your new account started.

* Requires 24 hour notice.

HeatShare
High utility costs can happen year round. HeatShare is a Salvation Army program that provides emergency utility assistance for people with no place left to turn. AU Customers have been supporting HeatShare since the late 90s. Your monthly donation will go a long way towards offering financial aid to those who are struggling. PRACTICE ENERGY CONSERVATION TO KEEP COOLING COSTS DOWN

Once there was a family who loved to leave their lights and appliances on all the time. Then one day, they received a high electricity bill that made them realize they needed to change their ways. They started turning off lights and unplugging appliances when they weren’t using them. As a result, their electricity bill decreased significantly. They also felt good knowing they were doing their part to conserve energy and help the environment. From then on, they made it a habit to always be mindful of their energy usage and continued to save money while helping the planet.

The Farmer’s Almanac uses words like “unrelenting” and “oppressive” when describing the heat that we’ll experience this summer. At a time when many customers are just catching up from winter bills, we encourage practicing some of these energy conservation tips to keep cooling costs down this summer.

- Have a Clean and Tune performed on your air conditioning system and replace the filter regularly.
- Set your thermostat at 78°F and use a fan when in the room to circulate air. Be sure fan blades turn counterclockwise and turn fans off when you leave the room.
- Close curtains and shades during the day and open windows at night to take advantage of “free” cooling.
- Remember, don’t try to heat or cool the outdoors! Close windows and doors when running the air conditioner. Also, make sure your air registers are clear of furniture or other obstructions so that air can circulate.
- Replace old-style lighting with LEDs and turn off lights when you are not in the room. The days are longer so when you can, use natural light.
- Wash clothes in cold water whenever possible or warm - not hot.
- Understand your energy bill so you know where to focus your energy saving actions.

Energy efficiency means to use less energy to perform the same task. Energy conservation is to not use energy. For example, turning lights off in an unused room is energy conservation while switching to more energy efficient lights such as LEDs is energy efficiency.

CONSERVE & SAVE

Staying cool doesn’t have to break the bank. When you select equipment that is energy efficient you may pay a little more, but you save money over the life of the equipment. Our hot rebates will help with the extra cost and leave you feeling cool this summer with more money in your pockets.

- AC Clean and Tune $25
- Central Air Conditioning start at $100
- Ceiling Fan w/LED Lights $25
- Electrical Heat Pump start at $100
- Smart Thermostat $50
- Window Air Conditioning $50

See rebate application for complete terms and conditions.

Purchasing Tips:
- Look for the ENERGY STAR and WaterSense logo for equipment that perform the same but use less water and energy.
- Check minimum efficiency requirements ahead of time to make sure your purchase qualifies for a rebate.
Air Conditioning (AC) Load Control is an important tool Austin Utilities uses to manage energy costs for the entire community. It only happens a few times each summer, but it is important for customers to know why and how.

**WHY we control AC**

Austin Utilities requires a load control device be installed on all residential AC units. By controlling the load for AC usage, together we LOWER THE COST OF PURCHASED POWER AND SAVE EVERYONE MONEY!

Brandon Schaefer
Engineering Service Technician

Brandon began his career at AU in 2015 as a Light Engineering Service Technician. In 2016 he joined the Transmission and Substation group, and in 2019 he became an Engineering Service Technician. He enjoys helping customers with their AC and other utility needs. Since joining the utility, he has worked for the City of Austin, Austin HRA, Medicap Pharmacy, MJ O’Connor, Inc., Jay C. Hormel Nature Center, Fraternal Order of Eagles, and Diane’s Salon Classics.

Brandon has been married to his wife, Tami, for 11 years and they have a 10 year old daughter, Isabel, and a 7 year old son, Brooks. He’s been married to his wife, Tami, for 11 years and they have a 10 year old daughter, Isabel, and a 7 year old son, Brooks. In his free time he likes to hunt, fish, camp, and play hockey. In the near future he hopes to coach his son in hockey and be the best dance Dad he can be. When retirement finally rolls around you’ll probably find him in a cabin on a lake.

**THANK YOU**

*TO THESE BUSINESSES FOR HELPING TO REDUCE OUR PEAK ENERGY DEMAND!*

Visit www.austuitilities.com to sign up your business. Businesses who sign up to be an Energy Hero receive recognition, including a Participation Decal to display in their business window, to let customers know they are doing what they can to help manage energy costs for the community.
